

NEKTON-Relax is a special vitamin supplement for birds on a natural basis to support stressful situations and by nervousness.

NEKTON-Relax contains natural components, such as chamomile, hop, valerian root and lavender as well as B vitamins and the amino acid L-tryptophan. They promote the production of serotonin in the brain and support birds which are nervous and restless, as well as keeping them calm in fearful or stressful situations. As a first step, a veterinarian should determine that the occurrence of atypical behavior, such as excessive screaming, is not due to a physical illness. Birds can also perceive a non-species-specific form of husbandry as stress. In this case it has to be determined what exactly triggers the atypical behavior and how the environment of the bird should be adapted.

NEKTON-Relax supports the bird organism with the help of the highly effective substances it contains to experience stressful situations more calmly.

Advantages:

- **NEKTON-Relax** supports the bird's organism to experience stressful situations more calmly
- **NEKTON-Relax** has not numbing or impeding effects
- **NEKTON-Relax** can also help to minimize atypical behavior
- **NEKTON-Relax** is not medication
- **NEKTON-Relax** is suitable for long-term administration to consolidate the animal's positive experiences

Please note:

- **NEKTON-Relax** is offered as a cure over a period of 4 to 12 weeks. **NEKTON-Relax** achieves its full effect after about 2 weeks. For upcoming exhibitions or shows - start the administering 2-3 weeks in advance.
- The first step should be to have a vet determine that symptoms are not due to a serious physical illness

Statement of ingredients: Dried brewer's yeast, calcium carbonate, hop, chamomile, valerian root, lavender

Guaranteed analysis per kg:

49,000 mg L-tryptophan, 8,000 mg niacinamide, 2,000 mg vitamin B6 (pyridoxine hydrochloride), 24 mg folic acid, 400,000 µg vitamin B12 (cyanocobalamine)

Sensory additive: 40,000 mg taurine

Available in sizes: 35 g, 130 g, 520 g

Feeding recommendation:

- Small birds should be given 0,5 g (½ NEKTON-spoon) **NEKTON-Relax** per day
- Medium-sized birds 1 g (1 NEKTON-spoon) **NEKTON-Relax** per day
- Birds the size of parrots should get 1-2 g (1 - 2 NEKTON-spoons) **NEKTON-Relax** per day

Administer the recommended daily dose in soft food. It is advisable not to administer **NEKTON-Relax** with water, as the compound contains natural components that are not water-soluble.
