

NEKTON - Drosophila breeding concentrate

NEKTON[®]
PRODUKTE
...tierisch gut!

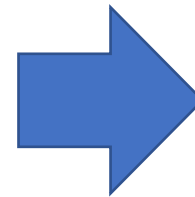

One-part NEKTON-Drosophila combined with 2 parts of water, just stir and it is ready to feed the fruit flies.
No cooking - no loss of sensitive ingredients.
A few drops of fruit vinegar speeds up the growth of the flies.

NEKTON-Drosophila is a concentrate to breed fruit flies to feed them to reptiles.

Available in sizes
250 g and 1,000 g.

The contained vitamins develop healthy, high quality and big food animals

NEKTON-Drosophila is the high quality and effective basis for the breeding of fruit flies as a food source for reptiles
