

NEKTON-PRE-VITAL⁺

Pure brewer's yeast enriched
with yeast cell walls for birds

NEKTON[®]
PRODUKTE
...tierisch gut!

NEKTON-PRE-VITAL⁺ is a combination of pure brewer's yeast (100 % *Saccharomyces Cerevisiae*, inactive) and yeast cell walls.

NEKTON-PRE-VITAL⁺ combines the advantages of the prebiotic and immunostimulatory effects of yeast cell walls with valuable nutrients of brewer's yeast.

The intestinal stabilizing function of the yeast cell walls can lead to a quick and good absorption of nutrients from brewer's yeast and makes **NEKTON-PRE-VITAL⁺** a valuable feed supplement, which can strengthen the immune system and can ensure more vitality and performance of the bird. The stimulated immune system makes the bird organism more resistant to pathogens of various kinds.

On the one hand, **brewer's yeast** is a high quality source of protein, on the other hand a valuable supplier of various nutrients and active substances.

Brewer's yeast contains:

- Numerous **B vitamins**, which are essential for diverse life functions. Vitamins B group are partly responsible for the nervous system and metabolism and have a positive effect on the bird's skin and plumage. Birds need the valuable B vitamins for a strong immune system.

- There are around 16 different **amino acids** in brewer's yeast, which are needed by the bird organism including for the cell and muscle tissue.
- Various natural **minerals** which are of great importance for bird health. Brewer's yeast is mainly rich in calcium and phosphorus
- **Trace elements**, which have a vital function for the metabolism and are involved in numerous processes in the bird organism. Among other things, iron, copper, manganese and zinc
- **Proteins** with a complete amino acid profile

The **brewer's yeast cell wall** consists of mannan-oligosaccharides (MOS) and β -glucans, which can reduce the number of harmful bacteria in the intestines of birds and can increase the number of beneficial bacteria.

This naturally can promote a balanced microflora in the bird's intestine

NEKTON-PRE-VITAL⁺:

- a valuable supplier of various nutrients and active substances which can have a positive effect on the whole bird's body
- the defense mechanisms of the bird can positively influence
- can have prebiotic effects on the beneficial microflora of the intestine and can naturally promote a balanced intestinal flora
- **NEKTON-PRE-VITAL⁺** is a purely natural product without synthetic additives

Available in the sizes: 50 g, 220 g, 430 g, 1000 g

Composition:

Brewer's yeast (100 % *Saccharomyces cerevisiae*), brewer's yeast cell walls (contains mannan-oligosaccharides and beta-glucans)

Difference to our NEKTON-Biotic-Bird:

NEKTON-PRE-VITAL⁺ is a feed supplement and primarily supplies the bird organism with valuable nutrients and active ingredients. The addition of yeast cell walls can also promote a balanced intestinal flora and reduce the number of harmful bacteria, which can ultimately lead to more vitality and performance.

NEKTON-Biotic-Bird is a probiotic whose main effect is the formation of a healthy intestinal flora and the support of the enzymatic digestion of food in the goiter and in the intestine. It is mostly used for digestive disorders, during regeneration after antibiotic treatments, during stress or heavy loads.

Feeding recommendation:

1 g (one measuring spoon enclosed) **NEKTON-PRE-VITAL⁺** with 100 g soft food. It is advisable not to administer **NEKTON-PRE-VITAL⁺** with water.

NEKTON-PRE-VITAL⁺ can be given daily as a cure for a period of up to 12 weeks or 2 to 3 times a week all year round.
