

NEKTON-Tonic F / K / I

For frugivores / granivores / insectivores

NEKTON^{1978®}
PRODUKTE
...tierisch gut!

The high-quality **NEKTON-Tonic** products are characterized in particular by the following:

- contain all 60 components in a fully unlocked form
- immediate disposal for the organism after administration
- without any strain on the digestive organs
- to support in case of illnesses, stress, moulting, rearing, acclimatizing newcomers or relocating

If necessary, **NEKTON-Tonic** can be administered as a complete feed for some time. **NEKTON-Tonic** is often the only way to provide sick and weakened animals with the necessary nutrients and thus to bring about an early recovery.

- Contained nutrients and active ingredients ensure the immediate utilization of the power and development food
- Enables the animals to produce the body's own enzymes and hormones
- Important basis to regulate bodily functions

To prevent symptoms of deficiency, **NEKTON-Tonic** can be administered two to three times a week - and daily in cases of increased stress.

Offer the nutrient solution in a separate bowl or pour it directly into the beak. For young birds, the **NEKTON-Tonic** solution should be supplemented with fiber (e.g. cooked rice) when fed with a spoon.

All **Tonics** can be combined with the following NEKTON products:
NEKTON-MSA | NEKTON-B-Komplex | NEKTON-E | NEKTON-Biotic-Bird

Nutritional supplement for frugivores granivores & insectivores

Especially for sick or very weak animals, our **NEKTON-Tonic** products have proven their worth for fast nutrient supply.

Available in sizes:

100 g
200 g
500 g
800 g
3.000 g

Advantages:

- ◇ Support during illness, stress and moulting
- ◇ For acclimatizing to additions or during relocation
- ◇ For strengthening a weakened or sick animal
- ◇ Fast availability thanks to the **Tonic** solution
- ◇ Excellent for breeding

Daily feeding recommendation:

- ◇ 100 g and 200 g **NEKTON-Tonic** products:
One level measuring spoon (inside) corresponds to 1 g.
As a nutrient solution: 1 g to 10 ml of water.
Or: Mix 1 g with 10 g soft food.
- ◇ 500 g, 800 g and 3000 g **NEKTON-Tonic** products:
One level measuring spoon (inside) corresponds to 10 g.
As a nutrient solution: 10 g per 100 ml water.
Or: Mix 10 g with 100 g soft food.
- ◇ **NEKTON-Tonic** is administered in a separate bowl, in addition to the drinking water (ideally enriched with NEKTON-S).
