

NEKTON-Biotic-Dog

Probiotic for dogs

NEKTON[®]
PRODUKTE
...tierisch gut!

NEKTON-Biotic-Dog is a supplementary feed which was specially developed to stabilize the intestinal flora in dogs.

- Ideal for indigestion
- During regeneration phases
- After antibiotic treatments
- In case of stress (e.g. when transporting the dogs)

The contained lactic acid-forming bacteria, which also occur naturally in the intestinal wall of dogs, promote healthy digestion of the food there. Natural mannan-oligosaccharides and fructans promote a positive composition of the intestinal flora through their prebiotic effect. Valuable herbal ingredients facilitate digestion in a gentle way and help to calm the intestines.

Dogs suffer frequently from indigestion. The causes are varied and often not exactly known.

Many digestive problems occur, for example, with illnesses or after antibiotic treatments. The gut can also be sensitive to stress (during transport or in situations that require a lot of effort and attention from the dog). As a result, the balance of the intestine is often affected. The pH value and the composition of the important intestinal flora are changed, to which the organism can react sensitively.

NEKTON-Biotic-Dog helps to stabilize the intestinal flora and uses purely natural active ingredients.

NEKTON-Biotic-Dog contains a particularly high number of *Enterococcus faecium* bacteria. This probiotic strain improves the consistency of the faeces, regulates the pH value in the intestine, so that an optimal habitat is created for the entire health-promoting intestinal flora. On the other hand, pathogenic (disease-causing) germs are suppressed. This is how the probiotic substances in **NEKTON-Biotic-Dog** work:

- Stabilize the intestinal flora
- Has a calming effect on the intestines
- Can increase the body's own defences

NEKTON-Biotic-Dog contains indigestible carbohydrates from the cell wall of yeast (mannan-oligosaccharides) and plant by-products (fructans), which are important nutrients for useful intestinal bacteria (prebiotics). The cell walls of yeast also supply so-called beta-glucans, which bind harmful substances in the intestine.

Another prebiotic substance is inulin, which is contained in greater quantities in dandelion.

Dandelion calms the intestines and has a cholagogue, diuretic and appetite-stimulating effect. Furthermore, dandelion has a stimulating effect on the metabolism and has an anti-inflammatory (antiphlogistic) and antispasmodic (spasmolytic) effect.

NEKTON-Biotic-Dog also contains a moderate amount of brewer's yeast, which provides the organism with numerous micronutrients such as various B vitamins. This counteracts a possible deficit of these nutrients, caused, for example, by diarrhea.

NEKTON-Biotic-Dog naturally does not use sugar or preservatives and is gluten-free.

NEKTON-Biotic-Dog can very well be combined with other NEKTON products for dogs.

Composition: Rice starch, derivatives of vegetable origin, yeast cell walls (contains mannan-oligosaccharides with prebiotic effects), common dandelion, dried brewer's yeast

Zootechnical additives:

Enterococcus faecium DSM 10663/NCIMB 10415, 3,5 * 10¹¹ CFU/kg

Analytical components:

Crude protein 17.0 %, crude fat 4.5 %, crude ash 3.6 %, crude fibre 4.5 %

Available in sizes: 40 g, 80 g, 200 g

Feeding recommendation:

Daily give one measuring spoon (1 g) of **NEKTON-Biotic-Dog** for every 5 kg of body weight. Give a maximum of 6 g per day. To apply for the treatment of indigestion over a period of 10-15 days or longer. It is recommended that a veterinarian's opinion be sought before use or before extending the period of use. Can also be given as support during the breeding season. Mix the recommended amount of **NEKTON-Biotic-Dog** under the food. Dry food can previously be sprayed with water for a better adhesion of the powder.
